It may be summer, but the Contact Boss team continues to work hard to add even more value to our contact data management solution. We love getting your feedback, so keep sending your comments and suggestions to support@contactboss.com as we make sure that Contact Boss provides the best possible contact database software.

Going Mobile! Our big news for this month is, of course, the official release of our mobile app for both iOS and Android. We know you are on the road and working away from the office more than ever, so this app will certainly make your life easier! Download the Apple iOS version here or the Android version here.

Events Feature Streamlined - The very efficient events management tool integrated within your Contact Management System has even more features now. You will be happy to hear that it's even easier to duplicate and make edits to your events with the provision of a randomly generated URL. Also, event attendees and participants will find it very easy to join your events via a new "Join Now" button for virtual/online events that can be included in the event email communications.
And to be sure you make the most of your events, we want to help you follow up with your attendees. It is now possible to set up an email that will be sent automatically to your event attendees once they are marked as attended. You can use a sample template provided or create your own and even include a link to a survey.

A New Look for Search - Not surprisingly the search tool is one of Contact Boss's most used features – now we have updated and improved the interface for even greater efficiency. Our new UI is also more mobile friendly on your mobile web browser.

Security Process - Don't you hate it when you forget your password or get locked out of your account? We'll make it easy for you to get back to work quickly and simply; Just click "Forgot password," enter the email you registered with, and you will instantly receive an email with a link to reset security questions and passwords. Similarly, if you get locked out, an Admin in your organization can arrange an email that will allow you to reset your security questions and password.

Ongoing Fixes - We continue to adjust Contact Boss, correcting any issues as they are noted.

Stay in Touch! - We are always happy to hear from you – send your comments and feedback to support@contactboss.com. Why not send us a quick testimonial telling us how Contact Boss has made your operation more efficient. Be sure to share our newsletter with your team members who use Contact Boss. We welcome your questions and we are always happy to offer user training sessions.

And if you are enjoying Contact Boss contact database management solution let your friends and colleagues know - we can set up a demo session so they too can learn about the best-in-class, most affordable contact management system available today!
