Today, we are pleased to announce the release of **Version1.5.2 of Contact Boss Pro and Premium,** *which focuses on technology/infrastructure improvements. Let's get to the highlights!*

We are excited to tell you that the **Beta Mobile Version1.0 (Pro and Premium)** for Android users is now available for download at the Play Store! Mobile functions include

- The ability to log in to your Contact Boss subscription
- A fully functional search just like the web version
- The ability to click on names to check profile details direct from search results
- The ability to send an email or dial the phone number directly from search results
- Options for bulk email deployments are also available

The Contact Boss iOS mobile app is now under development and will be released very soon.

Enterprise subscribers interested in adding a mobile app version should contact us to discuss requirements. Pro and Premium subscribers will find their Mobile Customer Code within the web version of the product in the next few days - a separate email will be sent to all Subscribers with details.

Take a look at additional new features of Version1.5.2:
You already appreciate our super search technology - now it's even easier to use and much faster, even when searching thousands of contacts. We have also upgraded our Cloud Server infrastructure resulting in still greater speed for all Contact Boss interactions.
Also new is improved transport of email addresses from search results to mass mailer tools like Mailchimp, Constant Contact, etc. The email addresses will be downloaded as a CSV file and can be imported directly into most email tools.

Planning an event?
An integrated event management tool is by far the best way to streamline conference and meeting planning and management. With Contact Boss you can set up and organize your online or in-person event with just three simple steps. Our tool supports the development of a custom event registration page; content editing; and the ability to add images and videos, define an online or in-person location, cap registration numbers, receive and track RSVPs, and record event attendees. Plus, the form can be edited or duplicated, saving time in organizing the next event!

Keeping track of follow-ups is easy with Contact Boss!
With our Contact Boss reminder tool, automatic reminder emails to be sent to team members on their first log-in of the week, helping them keep track of upcoming interactions and follow-ups.

Do you need a customized Contact Boss product ?
If you have specific contact data management challenges, we are happy to help. Our Contact Boss development team has been working with Enterprise version subscribers to customize Contact Boss Pro or Premium. Please contact us at support@contactboss.com to discuss your individual needs.

Tell us what you think!
How has your experience been with Contact Boss? If you love our prompt and friendly customer service, let us know! Share your thoughts on the new features we have developed. Just send a few lines to describe the features of Contact Boss that work best for your business! And spread the word to colleagues and friends who may be looking for a database management software with plenty of great features. We welcome any reviews of our software on Capterra as well! To post a review on Capterra please click here (using Google Chrome/Firefox) and click "Write a review."

Now is a good time to set up a **training session for your team**. We are happy to **demonstrate our robust contact management** and search features as well as our cool reminder/follow-up, visitor, event, and enquiry management tools. Call/Email us to arrange a video-call demonstration session to learn more about any of these and our many other features!

Watch for our next newsletter in July 2021, when we expect to be releasing the iOS Beta version of the Contact Boss mobile app!

Please share this email with all Contact Boss users within your organization and with friends and colleagues.
